

Crop: Cabbage	
Package of Practices	
Soil	Well drained fertile medium loam or sandy loam soils are best suited for crop growth. Avoid water logging soils.
Climate	Optimum temperature range for good germination is 25 to 30* C.
Season	As per the regional practices and timings.
Seed	180 to 200 gm per acre
Spacing	45 cm x 30 cm
Manures & Fertilizers	<p>8 to 10 tons of FYM per acre has to be incorporated into the soil before sowing. Green manuring crops before the main crop is also desirable. Basal Dose: 25:50:60 NPK kg per acre.</p> <p>First Top Dressing 10-15 DAT: 25:50:60 NPK kg per acre. Second Top Dressing 30-35 DAT: 25:00:00 NPK kg per acre. Third Top Dressing 50-55 DAT: 25:00:00 kg per acre.</p> <p>Boron & Molybdenum should be sprayed at button initiation stage.</p>
Irrigation	Irrigation is very critical during the growth and development of the plant but absolutely critical during the button initiation and development stage

Disclaimer: The results of above mentioned agronomy practices may vary depending upon the weather, soil type, other biotic and abiotic stresses.
